

Error No. 23: Pressure Range 2

The specified pressure in the hydraulic system has not been reached or a failure occurred in the electrical system of the pressure sensor its cabling. When using a two-cylinder hydraulic system the failure refers to the pressure built-up in cylinder 2. With the articulation system HNG 16.5 cylinder 1 is located in travel direction right, and with articulation system HG 15.3. From the serial number on the type label you can see what type of articulation system applies (e.g. 165).
