

SANEL DESTINATION DISPLAY

To load the destination panels complete the following steps:

- Load the " hattab.txt " file to an USB memory.

- Insert this USB to the USB socket of the control panel.
- If there is **SANEL** logo on the screen push the switch ones.

- You will see a menu, choose the **DOWNLOAD FROM FLASH MEMORY** tab by circular moves. Then push the button to confirm.
- Wait the data transfer to complete. There will be a message about the result of the data transfer.
-
- After see **DOWNLOAD COMPLETED** message, the transfer is completed. You can remove the USB if you want.
- After confirming this screen you will see the start-up menu again. In there select **SELECT ROUTE & LOAD**

- Choose the desired destination by circular moves then confirm the load by pushing.
- You will see a message about the progress. After finishing the load you will see the status report of the panels. The load is done.
